

CORDIS OBIEFULE

EdTech Product & Learning Experience Designer

cordisobiefule@gmail.com | Remote (EST) | [Portfolio](#) | [LinkedIn](#) | [Medium](#)

PROFESSIONAL SUMMARY

Learning Experience and EdTech Product Designer with a background in Computer Science, UX, and cognitive accessibility. I design learning products that reduce cognitive load and support neurodivergent learners. Seeking remote LXD, EdTech Product Design, and UX roles with globally distributed teams.

CORE SKILLS

Learning Design: LXD, Scaffolding, Microlearning, Cognitive Load, Accessibility

UX Design: Figma, Prototyping, User Research, Information Architecture

Technical: HTML, CSS, JavaScript, Canva, Claude

SELECTED PROJECTS

Blahlo — Language Learning App Concept

Designed a contextual language learning experience built on a self-created instructional framework, the Concentric Learning Model.

- Focused on meaning before memorization, using predictable, emotionally legible scenes to help learners discover vocabulary through context rather than translation.

Decodyyssey — Microlearning App for Critical Thinking

Designed a scenario-based microlearning app that teaches critical thinking through real-world Nigerian contexts instead of abstract logic puzzles.

- Built the instructional flow and UX from research through prototype, with a focus on accessibility and cognitive load.

Univerbal Redesign — AI Language Learning App

Conducted a cognitive UX audit and redesigned the onboarding and first-lesson experience for an AI-powered language app.

- Identified why beginners could not complete onboarding without learning a single word, then restructured the experience around scaffolded learning instead of AI novelty.

EDUCATION

B.Sc. Computer Science, Dominican University | *November 2022 – July 2026*

GPA: 4.6/5.0

Relevant Coursework: Human-Computer Interaction (HCI), Systems Analysis & Design, Software Engineering, Artificial Intelligence, Data Structures & Algorithms, Database Management

EXPERIENCE

Promotional Design Intern, Consumer Microfinance Bank | *July 4, 2024 - October 4, 2024*

- Designed data-driven promotional and educational materials, translating highly technical financial workflows into easily digestible, visual consumer guides.
- Collaborated with cross-functional customer support teams to identify user friction points, utilizing clear visual communication to resolve user onboarding bottlenecks.

IT Intern, IT PLUS | *July 9, 2025 - September 19, 2025*

- Architected and refined client website features using front-end technologies, focusing on user interface improvements and functionality.
- Tested and troubleshooted web applications across different browsers and devices, ensuring optimal user experience.
